

MINIMIZE YOUR ENVIRONMENTAL IMPACT
WHILE MAXIMIZING YOUR OPERATIONS

LEADER IN GEOSYNTHETIC CONTAINMENT SYSTEMS

APPLICATIONS

- Anaerobic Digesters
- Wastewater Lagoons
- Solid Waste Management
- Leachate Pads
- In-Ground and Above Ground Water Storage
- Secondary Containment
- Site Access Matting

GEOSYNTHETIC LINING SOLUTIONS

EXPERIENCE BUILT BY THE BILLIONS.

As a leader in environmental containment and site access solutions, Mustang Extreme has been supporting the renewable energy sector on an array of projects across the country. With over 2 billion square feet of liner installed, and more than 300 highly trained and skilled associates, Mustang Extreme Renewable Energy Services is one of the most experienced and capable environmental liner companies in the business. Our industry-leading expertise, unmatched quality control, highest environmental and safety standards, and extensive installation history makes Mustang Extreme a leader in a wide range of industries and applications across the U.S.

MATERIALS INSTALLED:

- 20, 30, 40, 60, 80 and 100 Mil HDPE and LLDPE Geosynthetic Membrane
- Geosynthetic Clay Liner (GCL)
- ClosureTurf®
- LiteEarth™
- Geocomposite
- Geosynthetic Textile
- Geonet
- Wind Defender® Ballast Systems
- PVC

APPLICATIONS:

- Manure and Run-off Lagoons
- Anaerobic Digester Lagoons
- Water and Wastewater Lagoons
- Solid Waste Storage and Management Systems
- Cap and Cover Systems
- Floating Covers

RNG

Coal Ash

Landfill

Mining

Power Generation

Oil & Gas

ENVIRONMENTAL SERVICES

A FULL SUITE OF CONTAINMENT PRODUCTS AND SERVICES

SECONDARY CONTAINMENT

We offer a range of top-quality secondary containment options to meet the specific requirements of individual operations. Our crews have installed systems in all terrains and ground conditions, ensuring compliance with state regulations. Our systems and installations are quality controlled and quality assured to meet the Occupational Safety and Health Administration (OSHA) standards.

- Steel Wall Systems
- Plastic Modular Systems
- Prefab Liners
- Polyurea Spray Liner
- Drive-over Systems
- Tank Pads

ABOVE GROUND STORAGE TANKS

Our fast-deploy, portable above ground storage tanks help operations get up and running faster, saving time, manpower and money. Our tanks have a huge storage capacity, relatively small footprint, and can be up and running in a few days. Aeration and remote water monitoring can be added to meet water management requirements and to help improve operational efficiencies. 10,000 BBL to 80,000 BBL capacities available.

HDPE PIPING AND FABRICATION SERVICES

With our extensive background in industrial plastics and experience across numerous industries and terrains, we have the expertise to fabricate and install everything from interconnects to “stingers.” We also design, fabricate, and install HDPE piping infrastructure such as manifolds, spools, suction/ discharge lines and more. Our team has a proven track record of completing projects in the most challenging environments on time and on budget.

SITE ACCESS MATTING

Construction of wind and solar projects often requires moving heavy equipment across soft and unstable ground. Our composite construction mats provide an ideal solution for creating safe access roads and work site platforms in even the most extreme conditions.

HELPING BUILD A HEALTHIER, CLEANER PLANET

Environmental, Social and Governance (ESG) is a core focus of Mustang Extreme, influencing every aspect of our operations – from running a transparent and professional business, to our emphasis on best-in-class health and safety training for our team members.
